# A. Project Area of Activities in Albania

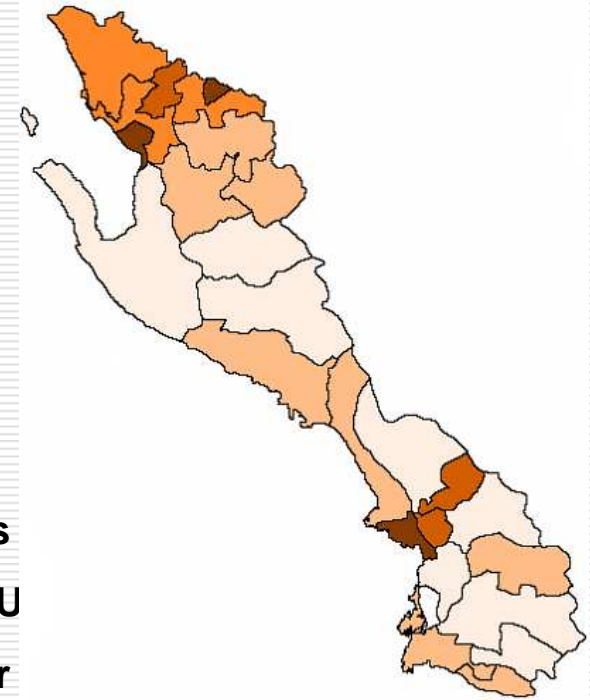

## Albania and Project Area

# Information on the project area

## Basic data

- ❑ Registered population more than 350,000
- ❑ Migrant population app. 55%
- ❑ In southern areas estimated annual income from resources
- ❑ In southern areas estimated annual flow from remittances U
- ❑ Labour force 60% and a high percentage of the local labour
- ❑ Small scale trade, agricultural activities and familiar tourism but is based exclusively in Albanian visitors
- ❑ Poverty level even higher income level comparing with other areas of Albania
- ❑ Areas very rich with fauna and flora habitat and diversity of fish species and other marine organism and wonderful landscape and more than 200 registered cultural monuments.

## Other comments on the area...

1. Presence of rural and semi-cultural communities facing decline, ageing population and abandonment;
2. Low income and dependence of income and employment on remittance from abroad;
3. Tendencies for community disintegration;
4. Very few organized groups and lack of specialization and as a result not appropriate use of the natural resources which will not help to build sustainable economic development models .
